

# **THE RILEY REPORT™**

## ***Portland Issues Poll***

**Exploratory Poll with Analysis and Cross Tabulations**

**February 6, 2006**

## **INTRODUCTION & METHODOLOGY**

Riley Research Associates conducted an omnibus survey among Portland area households. A number of public interest questions focused on City of Portland residents. Although the survey is scientific, the City of Portland sample is relatively small (n=173), with a margin of error of +/-7.45% at a 95% level of confidence. Fielding took place between January 24<sup>th</sup> and February 1<sup>st</sup>, 2006.

Because the sample was among households (not from a voter list), the survey participants were “self-identified,” in terms of their voter registration information. Responses included Democrats (53%), Republicans (20%), other parties (8%), unaffiliated voters (13%), as well as a small percentage of unregistered individuals (3%). According to Bellevue-based Labels & Lists (a popular voter list vendor), 25% of adult Portland residents are unregistered. Whether actual voters were more inclined to participate than unregistered residents, or whether some respondents chose to indicate their leanings (while not actually being registered), the party affiliation numbers are remarkably consistent with actual voter registration proportions.

## **FINDINGS**

### Public Campaign Financing

If this measure makes the May ballot, it appears residents would be inclined to continue the public funding program, with 44% supporting the program, 27% saying they would vote to end it, and 27% undecided. It appears to be more popular among younger residents compared to older residents, and much more popular among Democrats than Republicans.

### City Council Races

Eric Sten’s re-election campaign appears to be at a tipping point. While his most high-profile opponent - Ginny Burdick - has yet to make a significant impact, the question’s unaided response, “Not incumbent / Not Sten” was the single biggest vote getter (37%), followed by “undecided” (32%), and then Sten (28%). These findings seem to indicate an opportunity for a challenger.

For Commissioner Saltzman’s seat, large numbers of residents are currently undecided (62%). While Saltzman, the incumbent, enjoys a significant lead over challengers Lucinda Tate, Bruce Broussard, Amanda Fritz, and Don Smith (generating just one to four percent each), most voters have not yet become engaged enough to pick a favorite.

## The Tram Controversy

The City of Portland's controversial tram remains a divisive issue among local residents. Just under half support the city's participation (46%), while 40% say they oppose the city's involvement, and 13% are not sure what they think about the project. As with public campaign financing, older residents and Republicans are more likely to stand in opposition.

## Portland's School Levy

Getting either half of the required double majority could be tough for Portland area schools in the May election. With Mayor Potter announcing his *four*-year plan last week, statistically equal percentages supported and opposed our hypothetical *five*-year option, which (like the Mayor's proposal) calls for a just under 1% personal income tax and business surcharge, to benefit local schools. In our survey, 47% said they support the idea, while 44% oppose it and just 9% are undecided.

## CROSSTABULATIONS

**Q1. As you may be aware, Portland has adopted a public campaign finance program, which provides money to qualifying candidates. A group opposing the program has turned in petition signatures to place the issue onto the May ballot.**

**Assuming the measure makes it onto the ballot, would you vote to keep the public campaign finance program or vote to end it? (Is that strongly or somewhat?)**

**Q2. Also in the upcoming May election, a number of city council seats will be contested. In the race for commission seat number two, the current candidates include the incumbent Erik Sten, along with Ginny Burdick, Emilie Boyles, Robert Hinds, Lewis Humble, and Jory "Moof" Knott. Which of these will most likely get your vote?**

**Q4. As you may know, the city of Portland is participating in a development project known as the South Waterfront project, which includes a tram that will carry passengers between the development and the OHSU campus.**

**Would you say you support or oppose the City's participation in this project? (Is that strongly or somewhat?)**

**Q5. Portland residents will also likely be asked to vote on a public school tax. And one of the proposals under discussion is a five-year personal income tax surcharge of just under one percent, plus an extension of the business tax surcharge.**

**Would you be inclined to support or oppose this tax? (Strongly or somewhat?)**
